Fish

- 1 Brick Swordtails prefer the bottom of the tank.
- 2 The store was hot which made the water on top of the tank warm and the fish like cold water
- 3 There are more playthings at the bottom so they stay down there.

Dan Van Epps

Observations of Room

1 I see the light switch is missing two screws.

2 I see that the switch knobs aren't the same size.

3 The room has a light odor

4 I can hear the clock tick two times every minute.

5 I can feel the rough
edges of the seat

Meaning of Observations:

- 1 Must be an observable fact.
- 2 Must be clear in meaning.
- 3 Should be made in a planned orderly way.
- 4 Should be based on all available senses.

Inference. An idea you get from an observation, that goes beyond the observation

Qualitative Observation

An observation that describes a characteristic of something, (i.e. - He is tall)

Quantitative Observation

An observation using a number or measured value (i.e. - He is 6'8")
