

Crossword

A

Across

1. A substance which can't be broken down by normal chemical means.
2. Neutral particle in the nucleus of an atom.
3. The number of bonds an atom can have is called its _____.
6. The smallest particle of an element.
8. Na₂.
9. A colored dye which changes color in the presencees of an acid.
13. Particle with a positive charge in the nucleus of an atom.
14. NaCl is table _____.
15. Fe.
17. A radical with an electrical charge. ion
19. H
21. S
24. S
25. Chewing cud?
27. Cu gum
28. A compound that gives OH⁻ as the only negative ions.
29. The center of an atom.

Down

1. A group of symbols that show a chemical reaction.
2. Negative particle that orbits the nucleus of an atom.
3. Science that deals with the composition of matter.
5. A substance made up of two or more elements bound together.
10. A compound which releases H⁺ ions as the only positive ions.
11. H₂O
12. C
14. O
18. Z
20. The smallest particle of a compound.
22. I
23. Ca
24. The 2 in H₂O is called a _____.
26. A group of symbols that describe a compound.

Define

Element - a substance which can't be broken down by normal chemical means

Proton - Particle with a positive charge in the nucleus

Electron - a negative particle that orbits the nucleus of an atom

Neutron - neutral particle in the nucleus of an atom

Atom - the smallest particle of an element

Nucleus - the center of an atom

Compound - a substance made up of two or more elements

Molecule - the smallest particle of a compound

- 1 Formula - a group of symbols that describe a compound.
- 2 Equation - a group of symbols that show a chemical reaction
- 3 Valence - the number of bonds an atom can have
- 4 Isotope - an atom that has more or less neutrons

Ion - a radical with an electrical charge - atom that has gained or lost electrons

Acid - a compound that gives OH^- releases H^+ ions as the only positive ions

Base - A compound that gives OH^- as the only negative ions

Atomic Number - the number of protons an atom has

) Atomic Weight - number

) of protons + neutrons

) = Atomic weight

)

) Atomic Symbol - letter

) or groups of letters that
represents an element

)

) 2 88
