The math department has been very busy the past year to make our understanding of mathematics more complete and interesting in the years to come. First if you've taken Algebra 1 in 8th grade, you'll be happy to find out that if you score high enough on your placement test, you will be able to earn $\frac{1}{2}$ or even 1 college credit in math. They've arranged an Advanced Calculus course worth up to 1 COLLEGE

CREDIT.

The school has also spent \$3,900 on calculators to be used in the higher math courses. Thirty TI-55's were purchased to be used in Algebra II lower classes, and thirty TI-58's were purchased to be used in Algebra II and higher classes. In your future class choices you should seriously consider taking the math road; it will definitely pay off in college!!

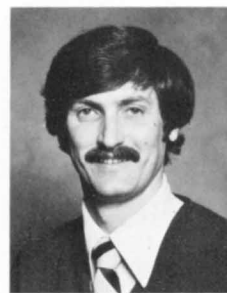

Some math heads in action.

The Rising Stars of English

Neil Buchanun

Dave Contini

Ray Johnston

Bonnie Mackey

Floyd May

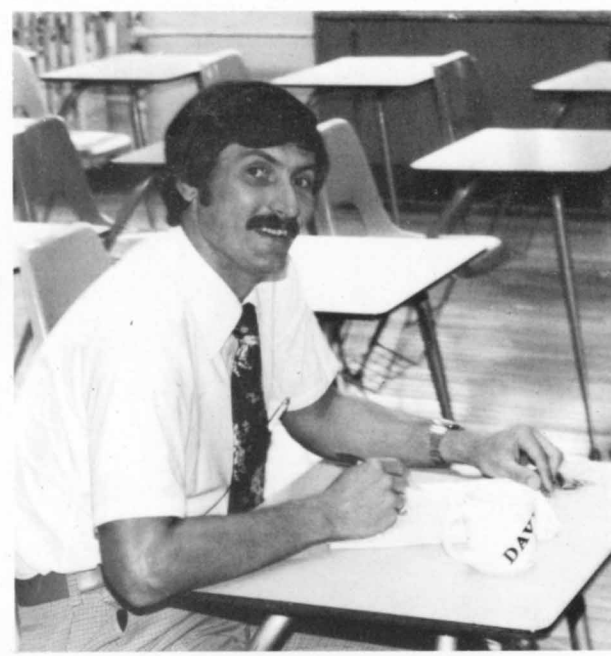

Barbara Peeper

Ruth Pritchard

Linda Reese (librarian)

Above, "Pick a number, any number!" so says Mr. May. Above right, Mr. Contini takes time out to get some "pep" from his morning coffee. At the right Mrs. Pritchard helps Kelly Reynolds. On the right page, Mrs. Mackey is busy getting those papers graded. Below her is Mr. Johnston and his best buddy, Craig Weiss.

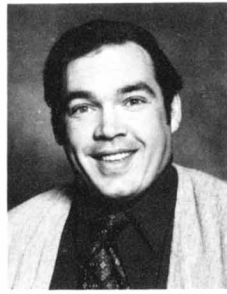

English course offerings got fewer this year as the English department felt the influence of the "Back to basics" movement and tightened school budget. Still many students "sweated out" those writing classes, knowing that it would pay off when they moved to the universities and colleges. Some wrote letters in business English while others studied literature from Chancer to Hemingway. Television productions of plays and stories helped add interest and cut the cost of renting movies. In fact, television seems to be opening new frontiers for the future English student.

On This Day

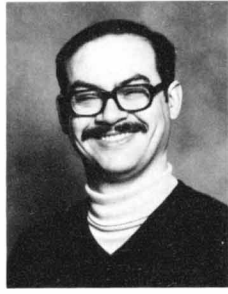

Thomas Henry

John Marks

Paul Mowrey

Jim Nixon

In History . . .

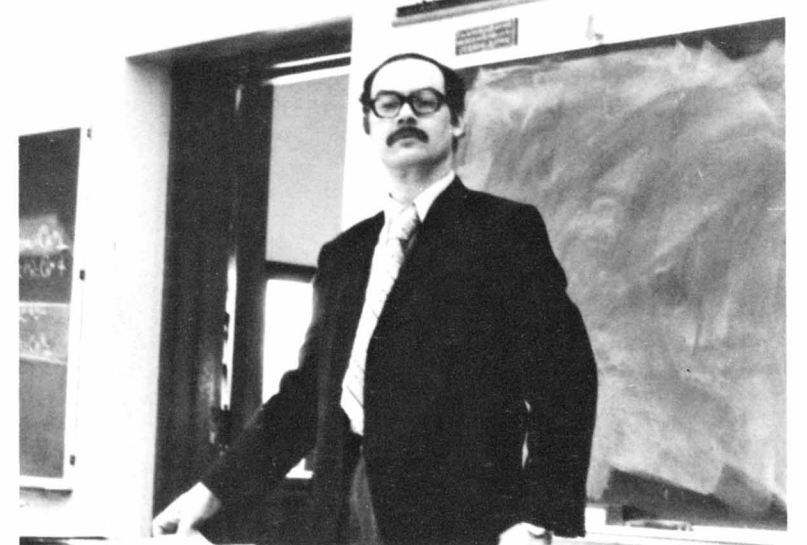

Brad Swinderman

Stanley Zurowski

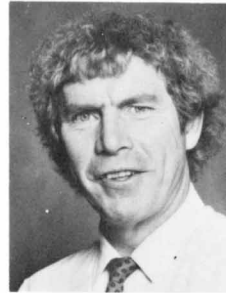

Changes came to the Social Studies department during the 80-81 school year. Mr. Swinderman's room took on a new look with painted murals of the Capitol, flag, and Statue of Liberty. Mr. Henry took a leave of absence, and Mr. Zurowski had to adjust to the world of history again. With this being a presidential year, the mock election was once again held and proved to be an even greater success than the previous year.

Ted Martin

Paul Koval

Opposite page, left, Dr. Schrader, who takes time out from his chemistry classes to act as chess club advisor, teaches Amy Marlowe the finer points of the game. Opposite at right we see not Mr. Martin, but his clone, a result of Advanced Biology's recombinant gene research. Opposite below, Mrs. Sanders tells Jana McCaslin what she should do with her Wheaton kit. On this page at left, Mr. Lorson performs a hair-raising physics experiment. And below, Michelle Hartz, Todd Mobley, Cathy Feller and Scott Daniels finish their creation — Ferbenstein!

Mrs. Koval

Miss Dean

Mrs. Groh

Serious French and Spanish students found help again from Miss Dean and Mrs. Koval when the year got started. But German students found a new teacher speaking "Deutsch," Mrs. Groh.

Industrial Arts

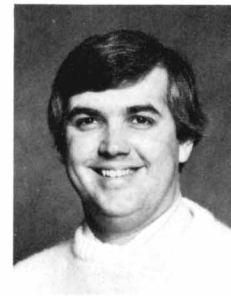

Mr. Ickes

Mr. Harmon

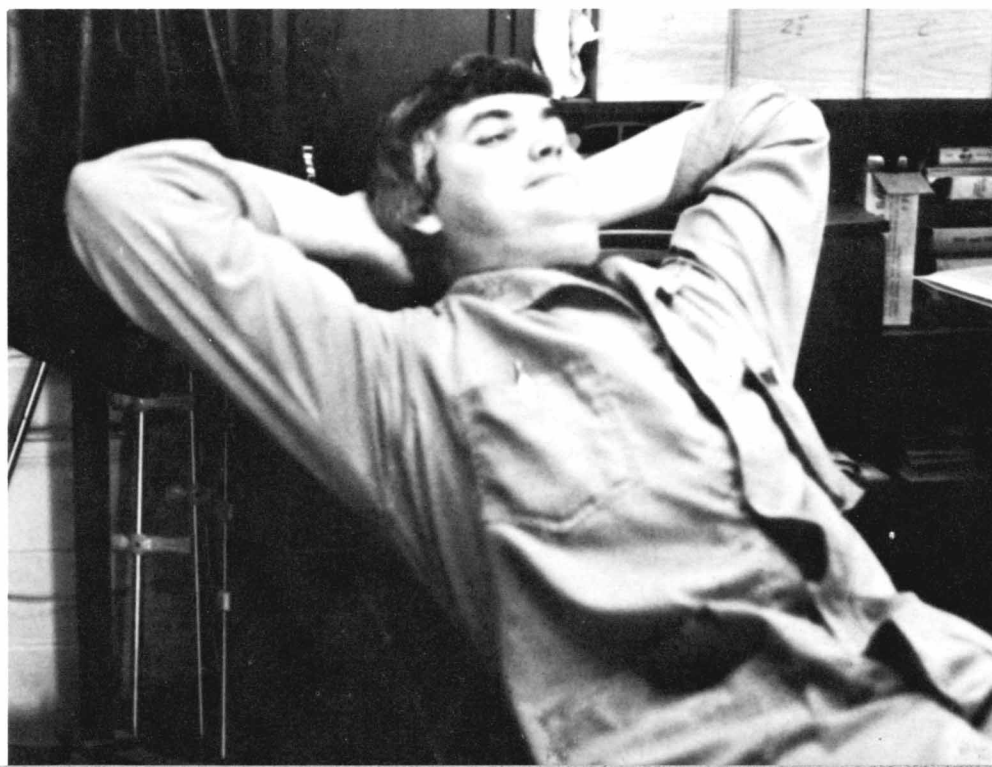

Mr. Martinelli

Mr. Johnson

Above, Mr. Harmon is busy grading papers at his desk in the shop room. Above right, Mr. Martinelli prepares a project for his graphics classes. Right, Mr. Johnson takes it easy after another hectic day in the classroom.

At left, Ms. Miller looks on as Craig, the chef, whips up a little something for lunch. Tim, supervisor, keeps a watchful eye on him.

The home economics foods department has two great teachers, Ms. Miller and Ms. Class. They both do a great job of teaching the do's and don't's of cooking and other home ec.-related topics.
